Architectural Sheet Metal Ornaments

AND ALL KINDS OF

Sheet Metal Work for Interior and Exterior Use

CATALOGUE No. 28

194-204 Mather St. Chicago, Illinois

COPYRIGHT, 1909

TO OUR PATRONS

Presenting this catalogue of Art Metal Ceilings and Side Walls, we take pleasure in calling your attention to the great number of new and handsome designs which we have recently added and which are adaptable for all classes of buildings.

Having the finest equipped sheet metal plant in the country many of the machines have been designed and built by us for the special work which they are intended for, and having only experienced hands to operate them we are therefore enabled to turn out the finest goods on the market.

We pay particular attention to our stamping, the smallest detail being brought out with sharpness and distinctness that cannot be equaled.

Our plates are made with a full bead on all four sides, and being resheared after stamping we have an absolutely perfect and tight fitting plate.

We employ our own modelers and are therefore enabled to make special designs from Architects details.

In this catalogue we have only shown a few of the many designs that can be made from the various panels, borders, mouldings, coves, etc., and if plans or measurements are sent us, we will be pleased to submit designs and prices.

With the best materials and first-class workmanship at your command we solicit a share of your patronage.

Yours truly,

FRIEDLEY-VOSHARDT CO.,
CHICAGO, ILLINOIS

Terms

Three days' acceptance, or two per cent discount for cash, if paid within ten days from date of invoice. Positively no discount after ten days.

Orders not paid in advance are subject to sight draft with exchange or cost of collection without further notice.

Cash advances must be made on receipt of goods.

In filling orders from persons not furnishing references or not favorably rated by commercial agencies we make shipment to our order and send draft, with bill of lading attached, through the bank for collection. Delays in filling orders will be avoided if the references are supplied when prices are asked.

Deliveries are for prompt acceptance and all orders are subject to strikes, accidents and unavoidable delays.

Telegrams must be prepaid by the sender.

Freights and express charges must be prepaid by the remitter.

Remittances must be made by New York, Chicago, St. Louis exchange, or its equivalent and not by personal check unless exchange is added.

Goods shipped according to order cannot be returned without our consent. When so returned freight must be prepaid and bill of lading with invoice sent us at once. Where goods are thus taken back it can only be done by allowing us sufficient amount from invoice price to cover cost of drayage and handling, also repainting if necessary. No allowance made for goods received in damaged condition.

We will not be responsible for any loss, delay or damage to goods after leaving our factory and no deductions will be allowed for same.

It is often impossible to send exact quantities of ceiling material required and customers sometimes receive more material than required. Such surplus is our property as no charge has been made for it, and must be returned by freight, no credit being allowed for same. This applies to quoted prices only.

When returning goods mark packages plainly with our name and address, also name and address of sender, also sending bill of lading to us as soon as shipment is made.

Important Notices

The prices shown in catalogue are for steel painted on both sides.

A liberal discount is the rule on list prices. On special quoted prices for all accessories (metal) the prices are set and subject to no further discount.

Prices quoted do not include furring strips, when furring strips are wanted we will furnish any size desired at lowest possible price.

Any planning mill can furnish these strips, the usual sizes next 1/4 inches. Our wall designs show a metal base finish, which is not furnished unless specifically ordered.

Prices quoted include nails for applying metal, wood brackets for cornices, t-nailed galvanized nites for cornices. We do not furnish nails for applying furring.

The weight of one square or one hundred square feet of metal ceiling or side wall material crated ready for shipment is about 70 pounds.

Metal Ceilings take fourth rate classification.

We also make copper plated and oxidized metal ceilings, prices on application.

Directions for Applying Our Ceilings

Strike a chalk line across the joints at right angles through the center of the room. On this line nail, with 2½-inch wire nails, 1½x1-inch wood furring strips, so that the center of the strips will be on the chalk line, and at every 24 inches from center to center, on each side of this strip, nail additional strips, until the line of cornice is reached; then strip is suspended brackets for supporting the cornice, then nail a cross strip every 24 inches in centers to permit nailing all around the outer edge of the plates.

Carefully level the strips by placing wedges between the strips and the joists to bring them all to a uniform depth, otherwise the ceiling will present an uneven surface when completed. When the ceiling is to be applied to shiplap, furring strips will not be required, but the shiplap must be level. 1900 designs, as shown in designs on pages 29 to 44, inclusive, and pages 88 and 92, cannot be applied without stripping.

Apply the ceiling plates each way from the center, consulting the plan as to the position of moulding, centers, etc. Lap one finished edge over the other and keep the lapping edges running from the light. If each piece is carefully lapped the beads will be straight and true and the joints not noticeable, as they become part of the general design.

Nail the ceiling to the strips with 3-penny fine wire nails, running through the center of the buttens every 6 inches. Use a sharp punch for making the nail holes where there are more than two thicknesses of metal. If a cornice is used, the pattern of which extends on the ceiling to take up the odd end of the room, leave the outer edge of the ceiling plate or moulding unnailed, to allow the cornice to slip under the plates; then nail as before. If the cornice used has not such a fitting pattern, a border or filler plate is used between the cornice and the moulding or field of the ceiling, which border plate must be cut to the width necessary and lap under the field plates and moulding.

Hammer down to "swedge" with a small dull tool any joints which may not

have lapped tightly, owing to the lapping heads becoming twisted or flattened in applying. This renders all joints tight and unnoticeable. Sufficient brackets are shipped to be placed at every joint.

Working plans, showing the arrangement of ceiling material shipped, are furnished in all cases where a diagram of the room is furnished, and detailed plans showing the method of applying the material are made. When desired, we can furnish experienced men to erect the material, charging for their time, transportation and board. If a diagram of the room to be ceiled is furnished, with the distances from point to point, and with the size and shape of offsets indicated, we can make more intelligent estimates, and, if desired, submit a design free of charge for the approval of the customer.

In all cases inform us of the height of the room and the distance between the tops of the window and door casings and the ceiling line, so that a cornice of suitable depth can be used.

If no choice of design is indicated, we will prepare an artistic arrangement of plates suitable for the shape of the room and the purpose for which it is to be used.

The advantages of our steel ceilings as a modern substitute for wood or plaster ceilings scarcely need comment. First—Because they are easy to handle and apply. Second—They have such a wide range of usefulness. Third—They are safe and fire-proof. Fourth—They are thoroughly sanitary, durable and permanent. Fifth—They are economical, being cheaper than plaster when durability is considered. Sixth—They are highly decorative and ornamental.

Our Patent Continuous and Panel Ceilings and Side Wall patterns combine these essentials in handsome and artistic designs that are light and elegant in appearance, simple and practical in construction and capable of the highest ornamentation. The matching joints between patterns are concealed by beads which enter into the general design and are not noticeable.

Detail Showing Construction of our Ceilings.

In furring on joists without plaster, work is sometimes facilitated by stripping on 6 inch centers, one way across joists. On plastered ceilings it is best to strip as shown above.

Design No. 8384

SUGGESTION: FOR PRODUCTION, ARTS, PHOTOGRAPHS, SPECIALS AND GENERAL OF LITERATURE BOOK REQUIRED.

Design No. 5123.

Completed at Cornice No. 5078, projection 16 inches, drops on wall 16 inches. Field Plate No. 5038, 24x24 inches, No. 8009, 24x24 inches, No. 5078, 24x24 inches; Molding No. 5111, width 6 inches, depth 2 1/2 inches, Center Piece No. 5110, 9'x9'6 inches.

Design No. 8196.

Composed of Cornice No. 8135 projection 7 1/2 inches, drop on wall 6 1/2 inches, Soffit Bead, Cornicing No. 8135, Filler No. 8138 6 to 24 inches wide, Border Plate No. 8091, Corner Plate No. 8074 each 24x24 inches, Field Plate No. 8136 12x12 inch multiple in Plates, 24x24 inches, Under Bead Plate No. 8138 12x12 inches, Zinc Brackets, Price No. 8142 12 to 48 inches wide, Foot Molding No. 5094 3 1/4 inches wide.

Design No. 8213

This design is made to represent a design for a ceiling or wall. It is intended for high ceilings and when erected properly, is for superior to other of the above class of work. Prices will be quoted on the design upon receipt of order. Composite of copies No. 8154 "A" and 8154 "B". Background filler No. 8018, corner ornament No. 8014, side ornament No. 8021, capitol piece No. 8140, center No. 8141, and pedestal No. 8142. Price, as applicable.

Design No. 8207.

This design is made of compressed Stucco or Carbon Pierre, and when put up right is far superior to either of them. The leaf and hand molding, center drop and ornaments are made of zinc with background of No. 2102 made of galvanized iron. Cornice No. 5128 and Molding No. 5111 are made of steel. Prices quoted on this design upon receipt of size of room.

Design No. 8210

Made in expression of design of Carlos Perle. Field Tile No. 8211, 4 1/2 x 4 1/2 inches. Cornice No. 8144, Field No. 8197 "A",
 3 to 18 inches wide. Molding No. 8091, 3 inches wide. Fls. Trim and Cornice to match.

Room 20140 to 1
 25450

Prices per 100 square feet.
 30.00

Design No. 8289

This design is made to represent Stucco or Plaster Relief work and when put up properly is far superior. The back-skin is composed of galvanized-plates No. 2062, with galvanized Molding No. 5111, and zinc ornaments. Corrosion to be of steel.
 Price depends upon size of room. Send plan of room for estimate.

Design No. 8296.

This design is intended for a wall panel and when ordered, will be in the shape of a square. The background is composed of
 a central medallion, eight smaller medallions, corner and filler medallions. Corner and filler medallions are of the
 same design as the central medallion. Cost of design and plan of room for estimate.

Design No. 8296.

Composed of Cornice No. 8133, 16 projection 16 inches, drops on side wall 10 1/8 inches. Filler No. 8138, 6 to 24 inches wide. Molding No. 5111, 6 inches wide. Background No. 8207. Border Panels No. 8208. Field Panel No. 8209. Zinc Rosettes No. 1078. Price on application.

Design No. 5286

Patented March 2, 1904. No. 772,000. This is a full and complete description of the same, and of the manner of its construction, and of the manner of its use, as shown in the accompanying drawings, in which—

Design No. 8368

Composed of cornice, No. 8153 B, 18 inches in width, drop in wall 15 1/4 inches. Filler No. 5010, 3 to 20 inches wide. Molding No. 8030, the balance of ceiling composed of zinc garlands, synclis, torches, center, etc., soldered to galvanized background. This ceiling is very elaborate and made to fit the rooms. The price depends upon the amount of zinc work used, therefore we will have to have exact measurements before submitting prices.

Design No. 8385.

Composed of Carriage No. 8314, which consists of Cornice No. 8410 and Owl Brackets, No. 8293; Filler No. 8418, 3 to 24 inches wide; Field No. 8416, 24x24 inches. Strappings and Center of Zinc soldered to galvanized background. Price on application.

Design No 8362

Composition corner of wall, square corner of cornice, No. 8362 and Corn Head Mould, No. 8363. Total No. 8362, 100 square inches wide. Molding
 100 square inches wide at the bottom. Holding on 8 1/4 x 2 1/2 inches wide band, No. 8363, 100 square inches wide. Molding
 100 square inches wide at the bottom. Holding on 8 1/4 x 2 1/2 inches wide band, No. 8363, 100 square inches wide. Molding
 100 square inches wide at the bottom. Holding on 8 1/4 x 2 1/2 inches wide band, No. 8363, 100 square inches wide. Molding

Design No. 8364.

Compound of Cornice No. 8315, which consists of Cornice No. 8310 and Lion Head Brackets No. 8311. Filler No. 8207, 3 to 24 inches wide. Mouldings No. 5111, 6 inches wide. Cartouches, Serrills and Roses, made of zinc, soldered to galvanized background No. 2102. Field No. 8071, 24x24 inches. This design is only suitable for large rooms and high ceilings.
Price upon application.

Design No. 8134

Appropriate for high ceilings. Price on application.

End Section No. 8134

Design No. 8062

Design No. 8095.

PATENTED

Composed of Corbels No. 8084, projecting 7 inches, depth on wall two inches. Filler No. 8028, width from 12 to 24 inches. Field Panels No. 8030 and 8071, 24x24 inches. Circular Molding No. 5111, width a foot, depth 2 1/2 inches, radius 6 inches inside. Molding No. 5113, width 6 inches, depth 2 1/2 inches. Tapering Panel No. 8149, under Piece part of No. 5108.

This ceiling would be placed in a room smaller than 47 feet square, and appears best in a room of that or near that size, or same may be placed to advantage in a room 17x13, or near that size, by doubling design.

Lock joint on two sides.

Design No. 8363.

Lock joint on all four sides.

LOCK JOINT CEILINGS

Patented October 6, 1903.

Our Lock Joint Ceilings shown on this page are far superior to any Lock Joint Ceilings on the market, as the plates after being locked together cannot be pulled apart or slip out.

Architects in specifying our Lock Joint Ceilings will get one that is absolutely tight and no open joints to show after it is erected.

The simplicity of the construction of the lock makes it one of the easiest to put together, thereby saving of labor as well as cross furring strips, thus making a cheap as well as an ornamental addition to our line of steel ceilings.

PRICES ON APPLICATION

The following Panels are made with Lock Joint.

- No. 8100.
- No. 8173.
- No. 8092.
- No. 5075.
- No. 5127.

Side Wall Design No. 8203.

Height 12½ in., neck 3 in.
In parts \$4.00
Complete 4.00

NO. 6454.

Height 12 in., neck 7 in., abacus 16 in.
In parts \$8.00
Complete 9.00

NO. 6199.

Neck 10 in., round, height 9½ in., abacus 18 in.
In parts \$7.50

NO. 6388.

Height 6½ in., neck 3½ in., abacus 7¾ in.
In parts \$2.25

NO. 6624.

Height 9½ in., width at base 20 in., face of pilaster 12 in., moulded sides.
In parts \$8.00

NO. 7143.

Diameter at neck 8 in., height 7 in., abacus 14 in.
Full capital, complete \$12.00
Half capital, complete 8.30

NO. 2406.

Diameter at neck 9 in., height 6½ in., abacus 11½ in.
Full capital, complete \$10.00
Half capital, complete 5.25

NO. 7127.

Height 8 in., abacus 14½ in., face of pilaster 9 in.
Full capital, complete \$8.00
Half capital, complete 4.20

NO. 7141.

Abacus 11¾ in., height 9¾ in.
In parts \$2.50

NO. 6453.

Height 11 in., neck 2 in., abacus 17 in.
In parts \$5.50
Complete 7.25

NO. 2405.

Face of pilaster 10 in., height 11½ in., abacus 15 in.
Full capital, complete \$6.25
Half capital, complete 3.20

NO. 7147.

Face of pilaster 7 in., height 6½ in., abacus 7½ in.
Full capital, complete \$1.75

NO. 7050.

Face of pilaster 7 in., height 6½ in., abacus 8½ in.
Full capital, complete \$4.50

NO. 7151.

Face of pilaster 5 in., height 6 in., abacus 8¾ in.
Whole capital, complete \$1.85
Half capital, complete 1.00

NO. 7010.

Height 6½ in., abacus 8 in., pilaster 5 in.
Full capital, complete \$1.65
Full capital, in parts 1.05
